Re: Walkway/Painting Project and Innovative Commercial Construction

To Whom It May Concern:

In June of 2008, Boca Siesta Condo Association contracted with Innovative Commercial Construction to refurbish the walkways on each floor of the building as well as repainting the building. Innovative did an outstanding job in aspects of the project.

Innovative replaced the carpeted walkways with a cementitious system that has the look of a tiled surface. It has updated the look of our building and all our owners have been extremely happy with the results.

The painting of our 7 story building has also been extremely well received by the owners and has also freshened and updated the look of our property.

The crews from Innovative that worked on the project were always courteous and they maintained a clean work area at all times. Additionally, Innovative worked very hard to accommodate owner scheduling issues when working on the walkways.

Boca Siesta would highly recommend Innovative Commercial Construction for any construction project.
